SUMMARY

I specialize in UI/UX design, frontend web development, and manual quality assurance, giving me a comprehensive understanding of how successful digital products are built. I design clear, user-focused interfaces and translate them into responsive front-end solutions. Alongside this, I conduct methodical manual testing to ensure stability, accessibility, and a seamless user experience.

WORK EXPERIENCE

Software Tester | PT. ICP CIPTA PRIMA   April 2024 - August 2024

- Conducted comprehensive testing on software applications to ensure quality and functionality.
- Designed and executed test plans, identified and documented bugs and issues.
- Worked closely with the development team to resolve issues using both manual and automated testing tools.

HIGHLIGHTED PROJECTS

- **Donor.in –** Designed a user-centered blood donation app, covering user research, flows, wireframes, and high-fidelity prototypes in Figma.
- **Capstone E-commerce App –** Built a responsive online store using React.js and Firebase with real-time auth and product features.
- **YouTube Scraping Tool –** Collected video data using Python, BeautifulSoup, and Pandas in Google Colab.

EDUCATIONS

Senior High School | SMA MUHAMMADIYAH 1 KLATEN   2018 - 2021
- Specialization in Science and Technology.
- Participated in extracurricular activities focused on IT and design.

University | Universitas Amikom Yogyakarta   2022 - Present
- Major in Informatics Engineering.
- Relevant coursework in Web Development, Software Testing, and Project Management.

CERTIFICATIONS

- Alibaba Cloud Certification
- Lab Assistant Certification
- MSIB Certification (Independent Study at PT. Hacktivate Teknologi Indonesia)
- Code Generation and Optimization Using IBM Granite Certification
- 2nd Place - ITO XIII & FEST UI/UX Competition at Politeknik Caltex Riau
